

CABLE ADDRESS:
HORSFORD, SOUTHWICK.

Southwick Nurseries.

GILLET & HORSFORD.

Southwick, Mass., July 24 1891

Dr. Sime Watson
Cambridge Mass.

Dear Sir,

I send you by to day's mail
some plants in flower which Mr.
Pringle sent from Mexico.

The *Amorastylis* is white in color,
but no name.

Zephyranthes Lindleyana. Mr. Pringle
wrote us ^{they} might ~~have~~ ^{be} come *Cosparia*
sumneri mixed in, but as
Reard says *C. sumneri* has
white + red flowers we are not sure
but the one sent may be it.

The *Calochortus Bonplandianus*
sent in flower we concluded might
be *Cyclobuthea flava*. we also send
one without the bulbs under

same name, Can you help
us out on these names?

The *Liguidia* Patscuaro I have
found has not been named yet.
I took it from the Tag and as
it was not plain I thought of course
it was the proper name instead
of the name of the place where
it was found, Mr Horsford
left for St. Louis before the bulbs
were ~~set~~ so I got no instructions
from him. I will see that
you have flowers of it if we have
any and they look now as if they
would flower later.

Yours truly

E. Gillett
